Project Title: *VOLIT-A Ride Website*

Submitted to: *Ma'am KAINAT*

Team members: *AITZAZ, WASEELA*

“VOLTI: A WEBSITE”

The purpose of creating the Volty website is to provide a platform for users to easily book their new eco-friendly ride. By offering a seamless online booking experience, we aim to promote sustainable transportation options and contribute to a greener environment.

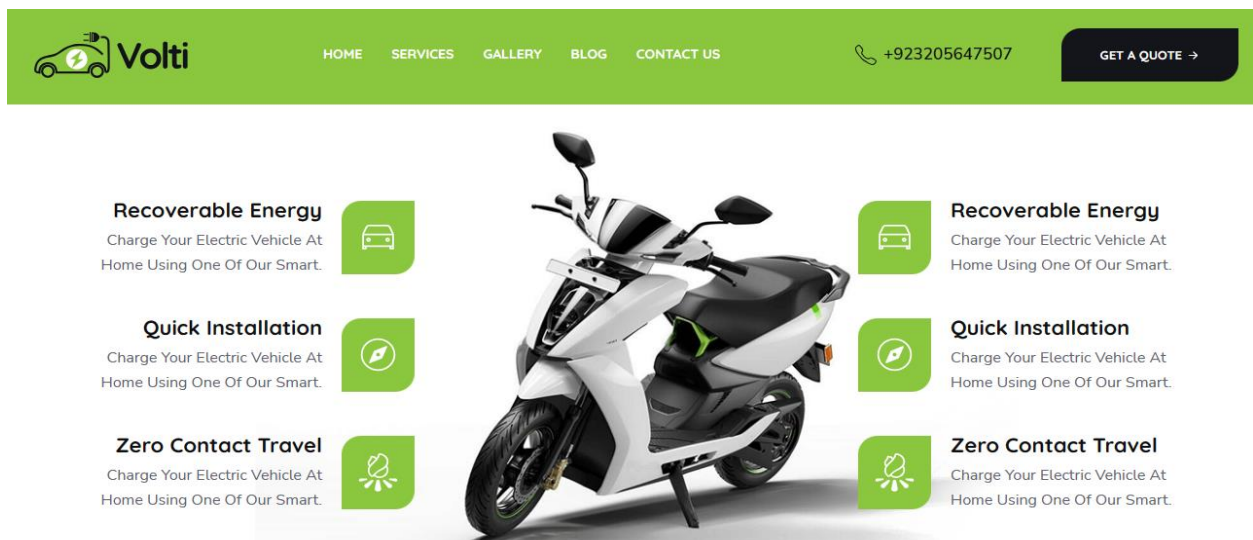

Target Audience:

Our target audience includes individuals who prioritize eco-friendliness and convenience in their transportation choices. This encompasses environmentally conscious consumers, urban commuters seeking efficient mobility solutions, and anyone looking for a convenient and sustainable way to get around.

Design process on FIGMA:

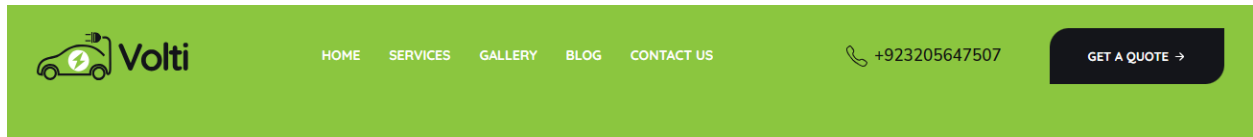

We utilized FIGMA to design the layout of my VOLTI website .With FIGMA, we created the homepage layout, including the placement of the logo, navigation menu and featured content. Additionally ,we designed the service section and incorporated a contact form for user inquiries.
